DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 21-28 and 34-35 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:
2. Originally presented claims 1-20 and newly added claims 29-33 are drawn to a swimming pool and valve apparatus, whereas newly added claims 21-28, 34, and 35 are drawn to a method for winterizing a pipe having anti-freeze. The inventions are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the product as claimed can be used in a process that does not pressurizing the anti-freeze in the pipe.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-28 and 34-35 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3753

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 29 and 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Plotsky et al (US Patent No. 5,577,274).

Plotsky discloses a swimming pool (24), swimming pool pipe (22) having a first end bordering an aperture in a wall of the swimming pool (figure 1), a one-way valve (figure 2 and 3), a hose adaptor (14), a gate channel (26) and a valve gate moveable to a first position and second position (42).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 30 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Plotsky et al in view of Hunt (US Patent No. 4,275,907).

Plotsky fails to disclose an adaptor inlet having a radially inward extending lip, a one-way valve comprising a housing having a groove for receiving the radially inward extending lip.

Hunt discloses an adaptor inlet having a radially inward extending lip (figure 3 and element 37) and a housing having a groove (28) for receiving the radially inward extending lip (figure 3). It would have been obvious to one of ordinary skill in the art at

Art Unit: 3753

the time of the invention to have provided the lip and groove of Hunt to the device of Plotsky et al. in order to quickly connect and disconnect the coupling as taught by Hunt (see col. 1, lines 26-33).

Conclusion

7. Applicant's arguments with respect to claims 29-30 and 31-33 have been considered but are moot in view of the new ground(s) of rejection.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cloud K. Lee whose telephone number is (571)272-7206. The examiner can normally be reached on Monday-Friday.
